DETAILED ACTION

1. This application claims benefit of the foreign application:
EUROPEAN PATENT OFFICE (EPO) 03028342.8 with a filing date 12/10/2003.
2. Claims 1-26 and 31-41 are pending in the application.

Information Disclosure Statement

3. Applicant's Information Disclosure Statement filed on June 01, 2006 has been considered. Please refer to Applicant's copy of the 1449 submitted herein.

Double Patenting

4. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a

terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-26 and 31-41 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claim 1, 19 and 21 of Ducray et al. US 7,304,018. Although the conflicting claims are not identical, they are not patentably distinct from each other and reasons are as follows.

Applicants claim compounds/compositions, processes of making, and their

methods of use of the formula, i.e., , see claim 1, 24 and 31 respectively.

Ducray et al. '018 claims compounds/compositions, processes of making, and

their methods of use of the formula, i.e., , see columns 26-28.

The difference between instant claims and Ducray et al. is that the instant variable X1 represents O, S, S(O) or S(O)₂, while Ducray et al. '018 represents O at the same position. Ducray et al. '018 compounds/compositions, processes of making, and their methods of use overlap with the scope of the instant invention.

One having ordinary skill in the art would find the claims 1-26 and 31-41 *prima facie* obvious because one would be motivated to employ Ducray et al. '018 compounds/compositions, processes of making, and their methods of use to obtain instant claims. Dependent claims 2-26 and 31-41 are also rejected along with claim 1 under the obviousness-type double patenting.

The motivation to make the claimed compounds/compositions derived from the known compounds of Ducray et al. would possess similar activities (i.e., compositions for treating parasites) to that which is claimed in the reference.
